PROFILE

Future full-stack engineer with a strong DevOps focus: development of **Spring Boot** / **React** and **Laravel** applications, containerized deployment (Docker, Kubernetes, GitOps) and monitoring. Two internships in industry and a first experience in applied AI (ML pipeline deployed via API). I am looking for a **6-month final-year project internship (PFE) starting February 2027**, in Morocco or abroad.

EDUCATION

National School of Applied Sciences (ENSA) – Tétouan **2022 – 2027**

- State Engineering Degree in Computer Engineering (expected 2027).

Baccalaureate in Physical Sciences and Chemistry, French option **2022**

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer Intern – HB Développement, Tétouan **July – August 2026**

Tech stack: Spring Boot, Spring Security, React, TypeScript, PostgreSQL, Tailwind CSS, n8n, Cron.

- Designed and developed end-to-end a web HRIS that digitalizes and automates the company's HR processes.
- Secured access (hybrid JWT, RBAC) and ensured leave traceability using the Ledger pattern.
- Implemented mobile BYOD attendance tracking via QR code with anomaly detection, and automated HR document generation with n8n.

Software Engineering & DevOps Intern – NAJA7HOST, Tétouan **July – August 2025**

Tech stack: Laravel 12, RabbitMQ, Docker, Kubernetes, Argo CD, Prometheus, Grafana, Gemini API.

- Designed a 6-microservice e-commerce architecture (Laravel 12, BFF pattern, RabbitMQ events).
- Integrated an AI chatbot (Google Gemini) providing real-time access to business data.
- Set up full monitoring: Golden Signals in Grafana, Prometheus metrics and Loki logs.
- Secured the services (JWT, OWASP) and automated GitOps deployment on Kubernetes with Argo CD.

PROJECTS

AgileFlow – Agile Management Platform (Full-Stack) **June 2026**

Tech stack: Spring Boot, React/TS, MySQL, WebSockets, Material UI, iText PDF.

- Developed the complete back office (users, projects, audit logs) of a Jira-like SaaS platform.
- Designed a KPI-tracking analytics module with automatic PDF report generation and export.
- Built DiagramFlow, an interactive visual editor, as well as the responsive landing page.

Nutrition Risk Classifier – End-to-End ML Pipeline **May 2026**

Tech stack: Python, XGBoost, scikit-learn, FastAPI, Streamlit, Docker, MLOps.

- Built a complete ML pipeline (CRISP-DM methodology) to classify nutritional risks.
- Achieved a Recall of 0.94 with XGBoost, a model optimized for asymmetric error costs.
- Industrialized the model (FastAPI REST API, Streamlit app) and packaged everything with Docker.

ChriOnline – Secure E-commerce Platform (Architect & Security Engineer) **May 2026**

Tech stack: Java 17, JavaFX, MySQL, Sockets (TCP/UDP), Bouncy Castle (TLS), JSON.

- Architected a client/server application (JSON protocol, real-time UDP notifications).
- Implemented low-level security: native TLS, anti-DDoS protection and IP spoofing detection.
- Protected sensitive data and payments with hybrid cryptography (AES/RSA) and hashing.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, C, C#, PHP, Dart.
- **Back-end & architecture:** Spring Boot, Spring Security, Laravel, FastAPI, ASP.NET, REST API, JWT, WebSockets, RabbitMQ, microservices, pytest.
- **Front-end & mobile:** React, Angular, HTML5/CSS3, Tailwind CSS, Bootstrap, Flutter, JavaFX.
- **Databases:** MySQL, PostgreSQL, MongoDB, Oracle, Supabase.
- **DevOps & cloud native:** Docker, Docker Compose, Kubernetes, Argo CD (GitOps), GitHub Actions (CI/CD), Prometheus, Grafana, Loki, n8n, Git/GitHub, Linux.
- **AI & ML:** scikit-learn, XGBoost, pandas, NumPy, Streamlit, EDA, feature engineering.
- **Networking & design:** TCP/IP, DHCP, DNS, Sockets, UML.

CERTIFICATIONS & LANGUAGES

- **IBM Applied DevOps Engineering** 2026
- **IBM Exploratory Data Analysis for ML** 2026
- **SAP Technology Consultant** In progress
- **Languages:** Arabic (native), French (fluent), English (B2).
